

# AsthmaGo™

**CMI Health's solution to put YOU, the patient  
in the driver seat for Asthma Management**

AsthmaGo™ is a home asthma self-management solution consisting of smart, home-use medical devices and a mobile application. When paired with CMI Health devices, the user can seamlessly measure, organize, and share their pulmonary condition, which provides a complete picture of health conditions in both real-time and over time.

## Device Compatibility

## Key Pain Points for Asthma Patient

### FDA Cleared Devices:

- Spirolink® – CMI Health Spirometer
- CMI Health Fingertip Oximeter
- OxyKnight Watch® – CMI Health Wrist Oximeter

### Other Devices:

- OxyKnight Watch Lite® -CMI Health Wrist Oximeter Lite Version
- Smart Inhaler Cap, Nebulizer etc. (coming soon)
- Challenge of measuring and monitoring both SpO<sub>2</sub> and pulmonary function in a singular aggregated source at home
- Difficulty of measuring / tracking the impact of preventative asthma treatment overtime
- Lack of overnight monitoring methods for severe asthma patients
- Limited access to specialized medical care (geographically)
- Difficulty of sharing health data
